

Avenues for Automotive Training

Breaking into a career is difficult, especially when it is one that has as much competition as the automotive industry. One of the best ways to get a job is to have a solid combination of education and experience. Many individuals are unsure of the steps you require to take to really get a job quickly and easily. Below are a few ideas for getting the training you require to be successful in the field.

Attend an automotive school. Although you may require more than just an education to be successful in your chosen career, school is a terrific place to start your automotive training. Because some automotive schools provide student resources such as help getting internships and post-graduation job positioning services, enrolling in a good school is the equivalent to attractive the first step toward a successful career.

Work as an intern. Most automotive schools reassert ongoing employed relationships with local automotive shops, garages, and dealerships. These relationships mean that there are some internships available after the school. Internships help you by giving you valuable on-the-job experience before graduation, giving you a better chance of being chosen for a job. Some internships may also give you credit toward your degree.

Work as an apprentice. Apprenticeships are seen less frequently than they were in the early days of our country, but they still exist. An apprenticeship is like an internship, except it is in lieu of a formal education. Someone who cannot give schooling works for an experienced member of the field, often for a small pay, in exchange for the opportunity to see more of the field.

Bust tires part-time. Although busting tires, which is a very attractive job, is considered by some to be a miserable job, it provides valuable automotive training. Many mechanics started out busting tires for an automotive garage or concern as they learned the ropes, gradually moving on to more advanced maintenance.

Change lubricator in a fill shop. Oil and fill shops specialize in changing the lubricator and filters in an automobile quickly, allowing customers to get in and out and on with their day. Although employed in a fill shop may not provide some development opportunities, it allows you to see your way around a car. When applying for positions at an automotive garage or dealership, you may therefore be able to show that you have had on-the-job automotive training.

Work behind a parts counter. There are some parts stores and parts departments in dealerships, where the do-it-yourselfers buy parts to mend their own cars. While employed behind a parts counter does not provide direct experience on cars, it does allow you to see a lot of different cars. Additionally, some parts stores provide training programs that you may apply to future jobs in the industry.
